

PUSH GREEN

CONNECTING THE PEOPLE TO ENERGY AND POWER

MY HOME. MADE BETTER.

Anya Bernstein - Anderson Place
Buffalo, NY

Anaya's Home - Built in 1870

"We knew by the age of the house that there were probably some things that we could do to help us save money on our monthly utility bills."

Working with PUSH Green took away the headaches often involved with doing home improvement work.
PUSH Green makes energy efficiency easy!

The Best Part!

Knowing that PUSH Green is working with trusted contractors that do right by the community was the best part. Being new to a city, it's hard to find reliable contractors that get the work done in a timely and professional manner. With PUSH Green I didn't have to worry about any of that - they took care of everything.

We're here to help make energy efficiency happen in our community.

Call PUSH Green at (716) 886-1780 or visit pushgreenwny.org

We're PUSH Green, a constituency-based organization, making it easier for homeowners, renters, landlords, not-for-profits and small businesses to participate in energy efficiency programs offered by the New York State Energy Research and Development Authority (NYSERDA). In addition to cutting waste and saving people money, these programs spark job and business opportunities—right here in our neighborhoods. We'll help you take the first step.

How I got started:

Friends of ours recommended PUSH Green because of the work that PUSH Buffalo does in the community. Being new to Buffalo I wasn't sure who I could trust to work on our home so I took my friend's recommendation and called PUSH Green.

How the program worked:

The process was simple and hassle free. After my Energy Advocate, Alex, came to my home and helped me figure out the program that worked best for me, PUSH Green took care of the rest. The contractors they selected were timely, professional, and helped me understand how the work I wanted to have done would really save me a lot of money in the long run.

Things we had done:

We chose to have whole house insulation, foam insulation, and air sealing done in our basement. Our contractor addressed the issues with our old, leaky, historic windows without having to replace them. The free energy assessment helped us identify other minor issues in our home that we were previously unaware of.

How the money works:

As part of PUSH Green's Friends and Neighbors program we were able to qualify for a discount that helped us save enough money that we didn't even have to finance our project! Now that the work has been paid for we can begin to see real savings on our monthly utility bills and keep a little extra money in our pockets.
