

Save Energy & Reduce Operating Costs With a **FREE** Energy Audit!

FREE energy audits are available for **small businesses & not-for-profits** with less than 100 kW in average monthly electric demand.

What Systems Are Evaluated...

Building systems typically evaluated in the walk-through audit include (as applicable):

- Lighting
- Heating
- Air Conditioning
- Ventilation
- Cooling/Refrigeration
- Domestic Hot Water
- Building Envelope
- Motors

The Audit Focus Is On Cost Effective Measures...

Typical measures include:

- Lighting improvements
- Lighting Occupancy Sensors
- Weatherstripping
- High Efficiency Furnaces and Boilers
- LED Exit Signs
- Vending Machine Controls
- Wall and Roof Insulation
- Automatic Setbacks of Heating / Cooling Systems
- Energy Efficiency Motors
- Fuel Conversions
- Energy Management Systems
- Window and Door Replacement

Your Energy Audit Report...

You receive valuable information to assist in making informed decisions about implementing energy efficiency improvements:

- Financial Analysis
- Financial Incentives
- Facility Description
- Equipment Inventories
- Energy Consumption Data
- Description of Recommendations
- Energy Procurement Info.
- Calculations and data
-

Your Energy Audit is Specific To Your Facility...

- The energy conservation measures that are recommended are identified and analysed based on how much, where and how energy is used at your facility.
- Choose the measures that meet your facilities needs and budget.
